Contents of Volume 44

No. 1

C.D. Geisler (U.S.A.)
Evidence for expansive power functions in the generation of the discharges of 'low- and medium-spontaneous' auditory-nerve fibers 1

N.Y. Marcus and D.C. Marcus (U.S.A.)
Transepithelial electrical responses to sodium and potassium of nonsensory region of gerbil utricle 13

P.K. Plinkert, A.H. Gitter, U. Zimmermann, T. Kirchner, S. Tzartos and H.P. Zenner (F.R.G., Greece)
Visualization and functional testing of acetylcholine receptor-like molecules in cochlear outer hair cells 25

W.J. Melssen and W.J.M. Epping (The Netherlands)
A combined sensitivity for frequency and interaural intensity difference in neurons in the auditory midbrain of the grassfrog 35

K.I. McAnally and M.B. Calford (Australia)
Neural sensitivity to phase of high frequency tones 51

H. Fujita (Japan)
Mutant golden hamsters with an abnormal outer hair cell stereociliary arrangement 63

W.F. Sewell (U.S.A.)
Synaptic potentials in afferent fibers innervating hair cells of the lateral line organ in *Xenopus laevis* 71

E. de Boer (The Netherlands)
Can shape deformations of the organ of Corti influence the travelling wave in the cochlea? 83

Short Communication
K.I. McAnally and M.B. Calford (Australia)
A psychophysical study of spectral hyperacuity 93

Announcement 97

No. 2, 3

R.D. Frisina, R.L. Smith and S.C. Chamberlain (U.S.A.)
Encoding of amplitude modulation in the gerbil cochlear nucleus: I. A hierarchy of enhancement 99

R.D. Frisina, R.L. Smith and S.C. Chamberlain (U.S.A.)
Encoding of amplitude modulation in the gerbil cochlear nucleus: II. Possible neural mechanisms 123

W. Jian, D. Wei-jia and C. Ji-sheng (China)
Changes in endocochlear potential during anoxia after intense noise exposure 143

P. Avan, D. Loth, C. Menguy and M. Teyssou (France)
Evoked otoacoustic emissions in guinea pig: Basic characteristics 151

I.M. Winter and A.R. Palmer (U.K.)
Responses of single units in the anteroventral cochlear nucleus of the guinea pig 161

C.A. Prosen, D.B. Moody, W.C. Stebbins, D.W. Smith, M.S. Sommers, J.N. Brown, R.A. Altschuler and J.E. Hawkins, Jr. (U.S.A.)
Apical hair cells and hearing 179

R. Rajan, D. Robertson and B.M. Johnstone (Australia)
Absence of tonic activity of the crossed olivocochlear bundle in determining compound action potential thresholds, amplitudes and masking phenomena in anaesthetised guinea pigs with normal hearing sensitivities 195

E. Zwicker and W. Peisl (F.R.G.)
Cochlear preprocessing in analog models, in digital models and in human inner ear 209

M. Kössl, G.P. Richardson and I.J. Russell (U.K.)
Stereocilia bundle stiffness: Effects of neomycin sulphate, A23187 and Concanavalin A 217

P. Van Dijk, E.R. Lewis and H.P. Wit (The Netherlands, U.S.A.)
Temperature effects on auditory nerve fiber response in the American bullfrog 231

C.D. Geisler, G.K. Yates, R.B. Patuzzi and B.M. Johnstone (Australia)
Saturation of outer hair cell receptor currents causes two-tone suppression 241
